DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-16 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: The best prior art of record discloses an organic electroluminescence display device, comprising: a substrate, a first electrode layer, a second electrode layer, an organic function layer and at least one electrochromic medium layer disposed over the second electrode layer. The prior art further teaches the substitution of an electrochromic device for an organic electroluminescence display device. However, the prior art fails to teach or fairly suggest an organic electroluminescence display device wherein the electrochromic medium layer is disposed between the first and second electrode layers, as claimed in claim 1. Claims 2-16 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- US Patent 7,002,294 discloses an electrochromic layer disposed above the cathode (figure 2).
- US Patent 5,442,478 discloses an electrochromic device.
- US Patent 5,444,330 discloses the substitution of an OLED for an electrochromic device.
